Kylertown, P. O., Mar. 1, 1865, ly. pd. Tun peculiar taint or infection which we call Schortta lurks in the constitutions of multitudes of men. It either produces or is produced by an en-feebled, vitiated state of the blood, wherein 1 be that fluid becomes inompetent to su tain the vital forces in their

igorous action, and leaves the system to fall into disorder and decay. The rerofulous contamination is variously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation:" indeed, it visit the iniquities of the fathers upon their children," The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, ad finally Consumption; in the glands, a Hings which suppurate and be-come ulcs ous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have bealth; with that "life of the flesh"

That it is far supe rior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, tuberculous deposits in the lungs, White ALSO —A lot of Sheep and Hogs. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach.
